

HONEYCOMB LAMPS

The Honeycomb Lamps are composed of hexagonal tubes welded together. Hanged by two rods from the ceiling, the honeycomb structure is identical to that of the wall lamps Wabbes designed in 1953.

Jules Wabbes

GENERALDECORATION

Honeycomb Wall Lamp

The Honeycomb Wall Lamp is a classic of our lamp range and is an exclusivity of General Decoration. It decorated the apartment of the King and Queen of Belgium on the Godetia, the ship of the Belgian Navy.

Royal Naval apartments Godetia,
1965 (Photo: Henri Kessels)

Composed of 32 hexagonal tubes brazed by hand, this iconic lamp was designed in 1953 for the high entrance hall of the Declercq's house built by André Jacqmain and Jules Wabbes.

HONEYCOMB WALL LAMP

Polished Brass | HWL-PB

To ensure it could be seen from both below and above, Jules Wabbes designed a lamp made of soldered hexagonal tube sections, so that the light source is filtered from both sides by the metallic structure.

circa 1968
©Jules Wabbes archives

The first copy of this ceiling light was probably created in 1968 for the private office of Louis De Poortere fitted out by Wabbes in Kortrijk, Belgium. The model was later sold to corporate executive offices. However, this item has remained relatively confidential, if not rare. Indeed, the light demands extreme attention in its manufacturing process. The golden light scattered by the honeycomb is particularly warm and celestial.
